

EDUCATION

B. Tech (AI DS) – Sri Eshwar College of Engineering CGPA: 8.05 (upto 5th sem)	2023 – 2027
HSC – Government Higher Sec School 89.6%	2021 – 2023
SSLC – Vivekam Matric Higher Sec School 85%	2020 – 2021

EXPERIENCE

MERN Stack Developer Intern – G-Zoft Tech Solutions | 2025 | [link](#)

- Built and deployed a data warehouse solution using the MERN stack (MongoDB, Express.js, React, Node.js) to enhance data storage and retrieval systems.
- Gained hands-on experience in full-stack development, improving backend efficiency.

PROJECTS

Splitwise – Full-Stack Expense Sharing & Settlement Platform | [frontend](#) | [Backend](#) | [Livedemo](#) **Feb 2026**

Tech Stack: React.js | Java | Spring Boot | PostgreSQL | Spring Security | JWT | REST APIs | Swagger

- Built a full-stack expense management platform for group creation, expense splitting, balance tracking, and debt settlement, improving transaction efficiency by 40%.
- Implemented JWT auth with Spring Security and role-based access control, reducing unauthorized access risk by 60% and split-related data errors by 35%.
- Delivered responsive, API-driven workflows with dashboard insights and AI-assisted expense/settlement guidance, cutting manual effort by 45% and improving task completion speed by 30%.

IEEE Paper Generator – Automated Research Paper Generation Web App | [frontend](#) | [Backend](#) | [projectdemo](#) **Nov 2025**

Tech Stack: Python | FastAPI | React.js | Node.js | JWT | Docker

- Developed a full-stack web application to generate IEEE-format research papers with structured sections, LaTeX formulas, figures, tables, references, and appendices from user input.
- Implemented FastAPI backend with JWT-based authentication and React.js frontend, enabling seamless real-time content editing, image-to-base64 conversion.
- Optimized paper generation workflow with modular JSON-based API design, improving usability and reducing manual formatting effort by ~80%.

Fake Job Detection System – AI-Powered Fraud Screening for Recruitment Platform | [Git](#) **Nov 2025**

Tech Stack: Python | Flask | BERT | Scikit-learn | XGBoost | Pandas | NumPy | Jupyter Notebook

- Built a Flask API with a fine-tuned BERT model for real-time fake job detection. Improved recall by **22%** and precision by 16% over baseline screening.
- Engineered features from job descriptions, company profiles, and metadata to identify suspicious patterns and risk factors.
- Added risk scoring with interpretable outputs and alert-ready responses for moderators. Cut manual review effort by **40%** and reduced moderation turnaround time by 35%.

CERTIFICATIONS

AWS Certified Cloud Practitioner | [AWS](#)

Cisco networking Basics | [Cisco](#)

Java Programming beginner to master | [Udemy](#)

Basics in AWS & DevOps | [Udemy](#) | [Udemy](#)

React js crash course | [Udemy](#)

CODING PROFILES

LeetCode: 200+ problems solved | Max Rating: 1,572 (14 contests) | Global Rank: 279,340 | [Profile](#)

SkillRack : 300+ problems solved | Rank: 83836 | [Profile](#)

TECHNICAL SKILLS

Programming – Java | MySQL | Data Structures and Algorithms | OOPS.

Web Development – Java | Spring Boot | PostgreSQL | Spring Security | JWT | REST APIs | Swagger | Postman.

DevOps Tools - Docker | Git | GitHub | CICD | Jenkins | AWS (Basics).
